

Signs of Zodiac
Better now

In days we were together
Your picture guards my sleep
In days we were together
My dreams been nice and sweet

I used to dream about you
Every night
I used to think about you
Every waking hour

Refrain:

I sleep better now since you decided to go your own way
I sleep better now since you decided to leave me
I sleep better now since you decided to go your own way
I sleep better now since you decided to go

But as the first clouds appear
First time you lied to me
My dreams get heavy
Full of pain and misery

So finally I killed your picture
Took it off the wall
My nightmare increased
We split and I sleep better now...
